

Wayland Baptist University-Amarillo
Division of Social and Behavioral Sciences

WBU's Mission Statement: Wayland Baptist University exists to educate students in an academically challenging, learning focused, and distinctively Christian environment for professional success, lifelong learning, and service to God and humankind.

Course Name: CNSL 5302 VC02 – Research Methods and Data Analysis

Term: Spring 2020

Instructor: Dr. J. B. Boren, PhD, CEP-C

Phone: (806) 352-5207

Email: borenjb@wbu.edu

Office Hours: by appointment, Amarillo Campus, Rm 101

Class Time/Location: varies (VC course)

Course Description: Development of basic research skills and the interpretation of research results.

Prerequisites: Students must have either completed an undergraduate statistics or a quantitative research methods course, or passed the CLEP or DANTES statistics test, or taken the statistics tutorial before registering for this course.

Text/Materials: Privitera, G. (2020) *Research methods for the behavioral sciences, 3rd ed.* Los Angeles: Sage. This text is required. (ISBN: 978-1-5443-0981-1)

Optional Materials: None.

Course Outcome Competencies: This course is designed to familiarize the counseling psychology student with methods and practices in research in the field. The licensed counselor is not required to be a research specialist, and the master's degree in counseling is not a research degree. However, anyone in a dynamic field of study such as counseling must be able to read, understand, and evaluate research in the field and then be able to apply it in the practice.

Upon completion of this course, students will be able to -

- Explain why scientific research is needed in counseling.
- Understand the APA and ACA ethics codes for research.
- Find and evaluate professional research materials.
- Describe the strengths and weaknesses of the types of research used in counseling.
- Explain the basic designs of experimental and non-experimental research.
- Describe techniques of measurements and sampling.
- Explain basic principles of probability and the normal curve.
- Understand when to use basic descriptive and inferential statistics.
- Read and explain the results of major statistical techniques in counseling journals.
- Apply knowledge to evaluate an area of counseling research.

Attendance Requirements: (Online Class)

Students are expected to participate in all required instructional activities in their courses. Online courses are no different in this regard; however, participation must be defined in a different manner.

1. Student "attendance" in an online course is defined as active participation in the course as described in the course syllabus. Instructors in online courses are responsible for providing students with clear instructions for how they are required to participate in the course. Additionally, instructors are responsible for incorporating specific instructional activities within their course and will, at a minimum, have weekly mechanisms for documenting student participation. These mechanisms may include, but

are not limited to, participating in a weekly discussion board, submitting/completing assignments in Blackboard, or communicating with the instructor.

2. Students aware of necessary absences must inform the professor with as much advance notice as possible in order to make appropriate arrangements.
3. Any student absent 25 percent or more of the online course, i.e., non-participatory during 3 or more weeks of an 11 week term, may receive an F for that course. Instructors may also file a Report of Unsatisfactory Progress for students with excessive non-participation.
4. Any student who has not actively participated in an online class prior to the census date for any given term is considered a "no-show" and will be administratively withdrawn from the class without record. To be counted as actively participating, it is not sufficient to log in and view the course. The student must be submitting work as described in the course syllabus.

Additional attendance and participation policies for each course, as defined by the instructor in the course syllabus, are considered a part of the university's attendance policy.

Statement on Plagiarism and Academic Dishonesty: Wayland Baptist University observes a zero tolerance policy regarding academic dishonesty. Per university policy as described in the academic catalog, all cases of academic dishonesty will be reported and second offenses will result in suspension from the university.

Disability Statement: In compliance with the Americans with Disabilities Act of 1990 (ADA), it is the policy of Wayland Baptist University that no otherwise qualified person with a disability be excluded from participation in, be denied the benefits of, or be subject to discrimination under any educational program or activity in the university. The coordinator of Counseling Services serves as the coordinator of students with a disability and should be contacted concerning accommodation requests at (806) 291-3765. Documentation of a disability must accompany any request for accommodations.

Course Requirements and Grading Criteria:

Grading:	Assignments	300 pts.
	Discussion Board	200 pts.
	Course Project Paper	200 pts.
	Quizzes	300 pts.
	Final Exam	100 pts.
	Total	1100 pts.

Grading Scale:	A	90% and above
	B	80%-89%
	C	70%-79%
	D	60%-69%
	F	59% and below
	I	Incomplete (given only in special circumstances; and only in last two weeks of course)
	W	Withdrawal (give to students who drop after the census date but before the deadline)

A grade of incomplete is changed if the deficiency is made up by the middle of the next regular semester, otherwise it becomes an "F." This grade is given only if circumstances beyond the student's control prevented completion of work during the semester enrolled and attendance requirements have been met, and then only in the last two weeks of a class. For a student to be granted an "I" the instructor must file an incomplete report which details which work must be completed by the student and the deadline date for the completion. The incomplete report must be signed by the instructor and the student (exception for VC students in remote areas).

Student Grade Appeals- Students shall have protection through orderly procedures against prejudices or capricious academic evaluation. A student who believes that he or she has not been held to realistic academic standards, just evaluation procedures, or appropriate grading, may appeal the final grade given in the course by using the student grade appeal process described in the Academic Catalog. Appeals may not be made for advanced placement examinations or course bypass examinations. Appeals limited to the final course grade, which may be upheld, raised, or lowered at any stage of the appeal process. Any recommendation to lower a

course grade must be submitted through the Executive Vice President/Provost to the Faculty Assembly Grade Appeals Committee for review and approval. The Faculty Assembly Grade Appeals Committee may instruct that the course grade be upheld, raised, or lowered to a more proper evaluation.

Specific Requirements for the Online Student-

- **Compatible Computer and Access to Blackboard-** You CANNOT take this course unless you can do the following-
 - Have regular access to a computer
 - Be able to log in to Blackboard
 - Be able to complete the assignments within Blackboard
 - Be able to rectify any software issues related to using Blackboard
 - Be able to communicate with the instructor via email
 - Know how to check to see if assignments have posted to Blackboard

If you cannot do ALL of the above, for the duration of the course, you must immediately do one of the following-

- Borrow a friend's computer to complete the above
- Find a public computer to complete the above
- Drop the course

****Computer incompatibility or software issues, or textbook inavailability is NOT an excuse for missing assignments, no is it grounds for allowing make-ups on assignments!! ****

Course Requirement Details-

- **Assignments-** Students will need to read along in the textbook and web-based materials. Assessment of student reading will come from student participation in posting materials in a timely manner, student performance on quizzes, and direct questioning from the instructor. While you may have gotten by in face-to-face courses with not reading, or sparsely reading your textbook, you will not survive an online course unless you read the text in some detail. Fair warning! There will be approximately ten homework assignments given in addition to the reading. These assignments will strengthen the students ability to work specific kinds of statistical problems. Because these are so important, 30% of the course grade will come from the successful completion of these assignments. Assignments designed to be submitted in Blackboard must be submitted there. Emailing them to the instructor will not suffice, since BB will grade them as a zero if they are not present. Assignments designed to be submitted via email, such as the topic approval discussion, should be emailed, of course.
- **Discussion Board-** Several topics will be presented on the discussion board for student response. Some topics will seek simple answers to questions; others will seek student opinions on controversial or contemporary topics. Not everyone will agree on all issues, but everyone should be able to make an argument from principle and facts (as opposed to emotions) for each topic. Be respectful in the way you disagree. Remember, a discussion board leaves no room for non-verbal communication, so some methods you use in person (such as sarcasm, teasing, etc.) may be interpreted as insults. Please communicate as effectively as possible, and don't be too quick to infer insult from someone else's response to your post.

Write your discussion board entries with the same care you would write a hard-copy to turn in for a grade. **Do not use emoticons or other 'chatroom' slang...these will receive deductions in points.** All of your writing in this course should be college-level and professional. The DB will comprise 20% of the course grade.

Write your post by adding a new thread to each of the topical sections. Do not attempt to attach

files...there are too many folks who won't have compatible software to open them. If you 'pre-write' your paper in other software, copy-and-paste it into the Blackboard window, or re-type it there.

Reply to previous postings by other students to add your comments to their posts. Do not be offended if other students do not agree with you. This is the place to put your opinions on these controversial subjects, but BE PREPARED to defend your opinions with facts. The instructor WILL CHALLENGE you if you post hearsay, myths, or other undocumented fallacies masquerading as facts. If you say "studies show" or "science has proven", I will insist on supporting research...I'll ask you to name those studies. Be prepared. One of my favorite quotes- "It ain't what we don't know that will hurt us...it's what we know that ain't so!" - Will Rogers

And finally, have some fun and learn something with it!!

- **Concept Paper-** Each student will complete a research concept paper relating to the field of counseling psychology. For more details, see the "Concept Paper" document which can be found in the Course Documents section. The instructor will work with individual students throughout this process. Students must be able to communicate in a timely way...those who hesitate will find no time to complete the project! The project is worth 20% of the course grade. I will grade your final draft. I will keep count of the number of times you submit draft copies of each chapter (1, 2, or 3), but I won't grade the submission of drafts. You are not required to submit drafts for editing, but doing so will likely result in a higher grade unless you are experienced at writing APA style papers. Important: Turning in a paper that was written for credit in a previous course, without attribution or permission from the instructor, is not acceptable college work (it is a form of plagiarism).

Note on the Use of APA Style: School of Social and Behavioral Sciences policy requires the use of the APA style manual for all papers. This style manual should have been taught in previous (undergraduate) coursework; however, if you were not instructed in the proper use of APA style, you are responsible for learning it for this course. Either get an APA style manual (most college bookstores have them, as well as amazon.com, etc.), or get online and google 'APA style' and look at some of the free resources you find there. I will deduct points from all assignments which require APA style but are not written as such. (This would include primarily your project in this course.)

- **Quizzes-** Open-book, timed quizzes are given per unit and will cover material from each assigned chapter of the book. The purposes of the quizzes are to assure the instructor the reading material is being read as assigned and to determine the level of competence with each concept from the textbook. Quizzes which are missed (i.e., timed out) may *not* be made up. The student's grade on the final exam will be substituted for each missing quiz grade. *If you complete all quizzes on schedule, you may waive the final exam.*

All quizzes must be completed on Blackboard by the due date. Quizzes will be unavailable after the due date, and cannot be made up. If you cannot take the quiz on the due date, make sure to take it early. The time allowed for each quiz is based on the length of the quiz. Most are ten to twenty minutes. If you have not read the chapter as assigned, you will have difficulty completing the quiz in the allotted time using the book. Once you start a quiz, you may not go back to it later. Finish it at that time.

Students who wait until the last day/night before attempting a quiz are asking for trouble. If BlackBoard is down, or your computer crashes, or there's a snowstorm and the power goes out, you will miss that quiz, and will then have to take the final! Start a day or two early!! Quizzes are 30% of the course grade.

The quiz schedule always starts on a Tuesday and ends on a Saturday (except the final). The quizzes become available at midnight Central Time and will time out (vanish) at 11:59 pm Central Time.

- **Final Examination-** A comprehensive final will be given. The final exam will be available for one week only...during the final scheduled week of the course. Please be sure to set your schedule so that you will

have time available for the final exam. The final exam is 10% of the course grade. Again, **if you complete all your quizzes, you are allowed to waive the final examination (that means you don't have to take it!).**

Email Account: As part of the basic requirements of this class, it is expected that every student will use their WBU email account. Email will be used by the instructor to disseminate information to students in such areas as general information, quizzes, and assignments. Further, it has been my experience that email provides a useful and convenient way for students to contact me with questions, comments, and/or concerns. Please use this means of communication to contact the instructor or any other students in the class. I prefer the email contact to phone contact, especially if you are notifying me of an absence.

ACADEMIC HONESTY: The following is adapted from the School of Language and Literature's Policy on plagiarism and academic dishonesty:

Writing is a collaborative art. Discussion and collaborative brainstorming are good. However, passing off another's **writing or ideas** as your own is plagiarism. It is unethical, it constitutes Academic Dishonesty (cheating), and it is sufficient grounds both for failure of a course and suspension from the university. Plagiarism does not have to be intentional. One can commit plagiarism by accident.

Common examples of plagiarism or academic dishonesty include the following:

- Copying any amount of text directly from an internet website, book, or other document without **appropriate citation** and synthesis into one's own discussion.
- Paraphrasing the ideas presented in any source or oral discussion without appropriate citation.
- Using the evidence and conclusions of any source as the controlling framework for one's own paper.
- *Recycling work from a previous or concurrent course*, even if it is your own work.
- Purchasing or otherwise downloading a paper from an internet website or other source.

In some writing assignments, you will be expected to incorporate scholarly sources into your document. ALL OF THE FOLLOWING must be met to constitute **appropriate citation** of any source:

- Including MLA, Chicago, or APA parenthetical or note-style citation format as required by the instructor.
- Placing borrowed text directly from another source within "quotation marks."
- Introducing clearly another author's voice into the document by means of a signal phrase (an introduction of that author).
- Offering, in short, a clear distinction between one's own voice or ideas and those of any outside authors brought into the discussion.

Any suspected instance of academic dishonesty, including plagiarism, will first be evaluated by the instructor and discussed individually with the student.

If the instructor determines that a student's actions constitute Academic Dishonesty, the case will be reported to the university executive vice president/provost, as per university policy. Per university policy, second offenses RESULT IN SUSPENSION FROM THE UNIVERSITY.

In this course, the first instance of Academic Dishonesty may also result in a zero on the assignment.

Disclaimer: The instructor reserves the right to cancel, change, modify, rearrange or otherwise divert from this document, to make changes as I deem appropriate, or to change, without notice, any of the information or requirements if I deem such change to be appropriate, in the best interest of the class as a whole, or when necessary due to unforeseen circumstances. This syllabus is not a contract, but a set of guidelines by which the class is intended to operate.

Course Outline:

Please see the detailed assignment schedule near the end of the syllabus.

Project- Write draft of Chapter 3 Project- Put it together; full draft			subm. draft by email subm. draft by email		Apr 23 May 5	
7	11	Final Paper (Project) Due	200	Project Journal Area		May 11
		Final Exam (if required)	100	Course Cont. area- U7	May 11	May 15

Project (Concept Paper) Checklist - CNSL 5302 VC02

This is a the timeline for completing your research project for the course. Make sure you are keeping up. If you fall too far behind, you won't be able to complete the project. All work must be completed in the APA style.

Two hundred points come from the grade for the final submission.

Schedule

<i>Date</i>	<i>Item</i>	<i>Points</i>	<i>Comments</i>	<i>"Due" Date</i>
Weeks 1-3	Selection of a Topic	20	<p>Come up with a topic you'd be interested in, and would like to complete for the project. Read Appendix A as part of this process. Make sure you clear the topic with the instructor via email. Getting approval by email is REQUIRED (20 pts). This is chapter 1 of your research paper. You need to have a draft copy started by the due date.</p> <p>Remember to post your topic idea on the DB for discussion with class mates. (This is a separate grade.) Bouncing ideas off class mates will help you narrow and focus your topic as well as give you some creative input into ways to research it.</p>	Mar 12 (sooner is much better)
Weeks 4-5	Intro Chapter (Chapter 1)	0	Write your draft of chapter 1 (introduction). This includes your thesis, research question(s), etc. You may email a copy to the instructor for editing (this is OPTIONAL...you don't have to do this.)	Apr 2
Week 6	Literature Review (Chapter 2)	0	Review relevant literature on your topic. (You may need to do some of this in conjunction with Chapter 1 above.) This won't be as exhaustive as a real research study...but you need to do enough to get your feet wet in the process. You should thoroughly review at least 3 important papers relevant to your topic. Submit this section separately from chapter 1. You may email a copy of this chapter to the instructor for editing (this is OPTIONAL...you don't have to do this.)	Apr 9
Week 7-9	Methods (Chapter 3)	0	Write out your procedures for data collection and analysis. This is not collection of actual data, but a description of how it would be collected if you were doing an actual experiment. Confer with the instructor...Ask questions! Submit this section separately from the others. This is chapter 3 of your research paper. You may email a copy of this chapter to the instructor for editing (this is OPTIONAL...you don't have to do this.)	Apr 23
Weeks 9-10	Re-write	0	Edit and re-write your prospectus and get it in final shape. Put the chapters together in a coherent form with segues, etc. This is the last day you can submit a draft for comments (again, optional).	May 5
Week 11	Due	180	Project is due on the Monday of the last week of class NLT midnight. This is the whole enchilada! Turn the project in via the Project Journal in the left column on Blackboard.	May 11

Finding Assignments in Blackboard

Here is a typical Blackboard control panel. (Yours may look slightly different...there may be a few more tools visible.) The tools may be in a different order, but each will function as described here.

1. **Announcements**- Course announcements appear here.
2. **Instructor information**, bio, contact info here
3. **Course information**- This is where you can find the syllabus to download, along with the other documents necessary to complete the course correctly. Download these by the first day of class.
4. **Course Content**- All the homework and assignments from the syllabus can be found here. They time in and out according to the schedule in the syllabus.
5. **Discussion Board**- Your DB assignments will be completed here.
6. **Project (Paper)**- The Journal where you will attach your final copy of your term paper is found here.
7. **Final Exam**- If you are not exempt from the Final Exam, it can be found here during the week in which it is open. See the syllabus for dates.
8. **Lecture Notes**- Optional lecture notes may be added here as needed.
9. **Course tools** can be accessed here.
